

A CONSOLIDATION PROPOSAL:

Reduce the carbon footprint of your purchases while saving time and money.

Reduce

Every time a delivery is made, energy is exhausted and we increase the carbon footprint. In our industry where deadlines are a fact of life, planning ahead is not always possible. However, many of the products we use are repetitive and can be planned for. By consolidating your orders you can save freight costs, save time by placing less orders, reduce paperwork and save money by cutting fewer checks. Let A. I. Friedman **build an inventory program** for you to more efficiently manage your ordering process. You will not only save time and money, but will also be helping the environment.

Consolidate

A. I. Friedman is truly a one-stop shop for departments and companies involved in graphic design. Not only art supplies, but digital imaging equipment and supplies, Apple, Office Products and Framing. **By consolidating all your purchases** at A. I. Friedman you take the benefits of Level 1 and dramatically increase efficiency to save time, money and really make an environmental impact.

Choose

Now add environmental friendly products as your standard. Inventory a recycled folder, file or pad. Use recycled binders and presentation products. Make sure your mix of products allows for recycling. Install an ink and toner-recycling program. Let A. I. Friedman build the Level 1 inventory program with these products and systems and complete the picture.
