DIGITAL PROOFING AND PRESENTATION

The continuous need for improved color accuracy in the digital art studio, for both proofing and presentation applications, has led to innovations from a variety of manufacturers. A. I. Friedman has developed the partnerships and technical knowledge to provide you with the right hardware and software for your digital needs, and within your budget.

APPLE

Apple is the unquestioned leader in computer platforms for the graphics and publishing market. As an Apple Specialist dealer we offer the full line of Apple products, from Xserve servers, Desktops and MacBook Pros to iMacs, MacBooks and iPods. Since we focus exclusively on graphics applications, we have the technical ability to configure a system right for your needs.

In this section, we present a wide range of hardware, software and supplies that at the time of printing of this catalog represents the best offerings for most applications. As the technology is rapidly changing, at any point in time a comprehensive evaluation with our technical staff of the best products to suit your needs is appropriate. Additionally, as equipment models and pricing change regularly, pricing for these items is not included. We are happy to prepare a quotation upon request.

PROACTIVE TECHNOLOGIES

Proactive Technologies offers customer-designed PC servers for all your software RIPs. These PC servers will run seamlessly with every major software RIP manufacturer such as Onyx, EFI, GGS, GMG and Colorburst. Proactive computers feature a 48-hour burn-in period and stress test at their factory, as well as 24-hour, 7-day phone support for hardware and operating system. Their three-year parts and labor warranty will assure you of uninterrupted production with your RIP and ink jet printer.

EXCEED YOUR VISION

Epson Stylus Pro Printers - HDR Ink

The Epson Stylus Pro Printers with the new HDR Ink Technology offers Epson's widest color gamut with a 10-color ink set and an on-board 11th ink allowing the choice between Photo Black and Matte Black. Like the K3 ink set printers, these printers are supported by most third-party RIPs allowing solutions to meet most any application.

Epson Stylus Pro Printers - K3 Ink

The Epson Stylus Pro Printers combined with the Ultrachrome K3 ink set offers an outstanding foundation for quality presentation and proofing applications. The eight separate ink channels and maximum resolution of 2880 × 1440 dpi produces incredibly sharp text and line art and extremely fine blends of photographic transitions. These printers are supported by most third-party RIPs which allows for a wide range of solutions to fit most applications. The printers are available in 17", 24" and 44" widths.

PHOTO TEX

A unique adhesive-substrate fabric material that can be placed on any (non-porous) flat surface indoors or outdoors. Photo Tex adhesive will not peel the paint off a primed wall, nor damage wallpaper when placed over. When removing there is a 99% certainty of no residue left behind. Photo Tex is re-positional and re-usable that withstands all temperature and weather conditions. The strength of the material makes it virtually impossible to rip or wrinkle. It has an opaque coating so you can illuminate it with a backlight. So versatile it can wrap around corners or poles. It is waterproof and can be laminated—cold or liquid recommended.
